

## MEASURING YOUR FIREPLACE

- 1** Front Width \_\_\_\_\_ inches      **5** Gas Stub Location (check)  
**2** Back Width \_\_\_\_\_ inches      Left  Right  Rear  Floor   
**3** Depth \_\_\_\_\_ inches  
**4** Height \_\_\_\_\_ inches
- Gas Type Used in Fireplace (check)  
 Natural       L.P.

## SPECIAL SIZING REQUIREMENTS

If using a Safety Pilot Kit, please allow an additional 3" on each side of the log set for a total of 6" additional space.

If using a Remote Control System, please allow an additional 6" on each side of the log set for a total of 12" additional space.

This additional space may be required to center your gas log set in the fireplace.

### HOW TO USE THIS MEASURING SHEET

Measure your fireplace. No need to be exact, you can round to the closest ¼ inch. Take all four measurements inside the fireplace. Note where the gas line enters in the fireplace. If you have questions, please note them on this sheet.

Bring this measuring sheet back to O'Malia's for a price quote on a new set of gas logs.
